ZOOM VIEWING OPTION

We recommend viewing today's presentations in Side-by-side mode. Please adjust your **"View Options"** accordingly to your preference or suggested setting below.

1. When in a Zoom meeting or webinar and the host is sharing their screen, you can select View Options in the top menu bar to enable **"Side-by-side Mode"** during the presentation.

2. Then, find the “**View**” button in the upper right corner, and set it to “**Side-by-side: Speaker**” to put the speaker on the right of the shared screen. You can drag the slider between the shared screen and speaker to make the speaker’s video more prominent than the slide and vice-versa.

BREAKOUT ROOMS

Breakout Rooms information and example

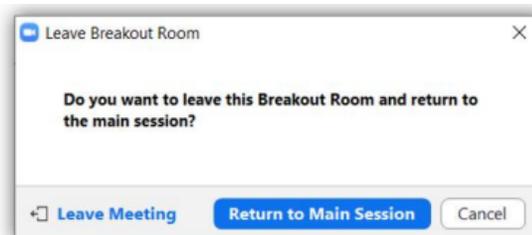

If the host has allowed participants to self-select and join breakout rooms of their choosing, participants will be able to view and select from a list of breakout rooms the host has created. They will be able to enter and leave breakout rooms freely.

Note: Participants not joined with the desktop or mobile app (version 5.3.0 or higher) will not be able to self-select a breakout room. The host will need to facilitate moving these participants manually.

1. Click **Breakout Rooms**  in your meeting controls.
This will display the list of open breakout rooms created by the host.
2. (Optional) Click **Expand All** to expand all available rooms and see which participants are in that particular room.
Note: The **Expand All** and **Collapse All** options require version 5.9.6 or higher.
3. Hover your pointer over the number to the right of breakout room you wish to join, click **Join**, then confirm by clicking **Join**.
4. Repeat as necessary to join other breakout rooms, or click **Leave Room** to return to the main session.

You have the option to move from room to room. Please make sure to leave the room and not the meeting.

If you accidentally leave the meeting, please use this [link](#) to re-enter the Zoom meeting and join a breakout room.
