

Cayuse IRB Expedited Protocol Review Instructions

Making Decisions for Expedited Reviews

If primary & secondary reviewers have been assigned to a submission with an expedited review protocol, they will make their decision based on their review and comments. The reviewers assigned to the submission may enter their decision, and the Analyst will make the final decision.

➤ Review & Make a Decision

Review and comment on the submission by clicking on Review on the Submission Details page.

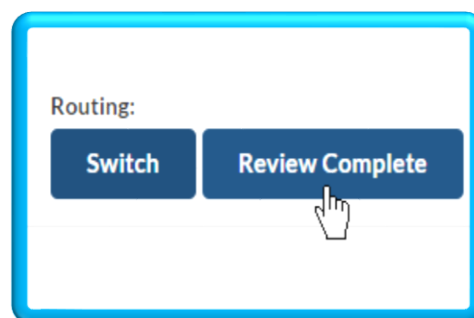

Once the review is complete, click **Make Decision** beneath Required Tasks.

Review Information: If you need to return the submission to the analyst to arrange a full board review, you should select **Not Expedited** as the decision and complete the review.

➤ Review Complete

Once you have recorded and saved your decision, return to the Study Overview page and select **Review Complete** to return the submission to the Analyst.
